ANNUAL INDEX

Bae, Hyeong-Ohk and Choe, Hi Jun. *Existence and regularity of solutions of non-Newtonian flow*, 379

Billi, L. and Farina, A. *Unidirectional infiltration in deformable porous media: Mathematical modeling and self-similar solution*, 85

Brown, Kevin G. and Choudhury, S. Roy. *Kelvin-Helmholtz instabilities of high-velocity magnetized shear layers with generalized polytrope laws*, 401

Choe, Hi Jun. *See* Bae, Hyeong-Ohk

Choudhury, S. Roy. *See* Brown, Kevin G.

Dang-Vu, H. and Delcarte, C. *Spatial heteroclinic bifurcation of time periodic solutions to the Ginzburg-Landau equation*, 459

Davis, Philip J. and Najfeld, Igor. *Equisum matrices and their permanence*, 151

Day, W. A. *Time versus distance for the propagation of heat in bounded domains*, 325

Delcarte, C. *See* Dang-Vu, H.

Denny, D. L. and Pego, R. L. *Models of low-speed flow for near-critical fluids with gravitational and capillary effects*, 103

Dufour, Françoise and Néel, Marie-Christine. *Time-periodic convective patterns in a horizontal porous layer with through-flow*, 265

Ercole, Grey. *Delta-shock waves as self-similar viscosity limits*, 177

Evans, J. D. *See* Kember, G. C.

Farina, A. *See* Billi, L.

Fowler, A. C. *See* Kember, G. C.

Gangbo, Wilfrid and McCann, Robert J. *Shape recognition via Wasserstein distance*, 705

Giannakopoulos, Fotios. *See* Kooij, Robert E.

Giorgi, Claudio; Pata, Vittorino; and Marzocchi, Alfredo. *Uniform attractors for a non-autonomous semilinear heat equation with memory*, 661

Godin, Yuri A. *Corrigenda: An exact solution to a problem of axisymmetric torsion of an elastic space with a spherical crack*, 795

Golden, J. M. *Free energies in the frequency domain: The scalar case*, 127

Greenspan, Donald. *Conservative motion of a discrete, tetrahedral top on a smooth horizontal plane*, 17

Guo, Jong-Shenq and Hu, Bei. *Quenching profile for a quasilinear parabolic equation*, 613

Hattori, Harumi. *Breakdown of smooth solutions in one-dimensional magnetostriction*, 1

Hayashi, Makoto. *A note on the uniqueness of the closed orbit of the Fitzhugh-Nagumo system*, 171

Herrero, M. A.; Medina, E.; and Velázquez, J. J. L. *The birth of a cusp in the two-dimensional, undercooled Stefan problem*, 473

Hsiao, Ling and Pan, Ronghua. *The linear stability of traveling wave solutions for a reacting flow model with source term*, 219

Hu, Bei. *See* Guo, Jong-Shenq

Hu, Jiaxin. *Two-dimensional Riemann problem for pressureless gas dynamics equations with functional solutions*, 251

Irago, H.; Kerdid, N.; and Viaño, J. M. *Asymptotic analysis of torsional and stretching modes of thin rods*, 495

Junca, S. and Rascle, M. *Relaxation of the isothermal Euler-Poisson system to the drift-diffusion equations*, 511

Kangro, Raul; Kangro, Urve; and Nicolaides, Roy. *Extendability of solutions of Helmholtz's equation to the interior of a two-dimensional scatterer*, 591

Kangro, Urve. *See* Kangro, Raul

Kember, G. C.; Fowler, A. C.; Evans, J. D.; and O'Brien, S. B. G. *Exponential asymptotics with a small exponent*, 561

Kerdid, N. *See* Irago, H.

Knops, R. J. and Villaggio, P. *Spatial behaviour in plane incompressible elasticity on a half-strip*, 355

Koch, Herbert. *Slow decay in linear thermoelasticity*, 601

Kooij, Robert E. and Giannakopoulos, Fotios. *Periodic orbits in planar systems modelling neural activity*, 437

Liu, Weijiu and Williams, Graham H. *Exact controllability for problems of transmission of the plate equation with lower-order terms*, 37

Marcati, Pierangelo and Mei, Ming. *Convergence to nonlinear diffusion waves for solutions of the initial boundary problem to the hyperbolic conservation laws with damping*, 763
Marzocchi, Alfredo. *See* Giorgi, Claudio
Mascia, Corrado. *Qualitative behavior of conservation laws with reaction term and nonconvex flux*, 739
Matsumura, Akitaka and Nishihara, Kenji. *Global asymptotics toward the rarefaction wave for solutions of viscous p-system with boundary effect*, 69
Matušů-Nečasová, Š. *Existence of classical solutions of the equations of motion for compressible fluids of second grade*, 369
McCann, Robert J. *See* Gangbo, Wilfrid
McHugh, John P. *The onset of convection in horizontal cylinders*, 425
Medina, E. *See* Herrero, M. A.
Mei, Ming. *See* Marcati, Pierangelo
Najfeld, Igor. *See* Davis, Philip J.
Néel, Marie-Christine. *See* Dufour, Françoise
Nicolaides, Roy. *See* Kangro, Raul
Nishihara, Kenji. *See* Matsumura, Akitaka
O'Brien, S. B. G. *See* Kember, G. C.
Pan, Ronghua. *See* Hsiao, Ling
Pata, Vittorino. *See* Giorgi, Claudio
Pego, R. L. *See* Denny, D. L.
Rascle, M. *See* Junca, S.
Renard, Yves. *Singular perturbation approach to an elastic dry friction problem with non-monotone coefficient*, 303
Richardson, G. *The bifurcation structure of a thin superconducting loop with small variations in its thickness*, 685
Rochdi, M. and Shillor, M. *Existence and uniqueness for a quasistatic frictional bilateral contact problem in thermoviscoelasticity*, 543
Scarpetta, Edoardo and Sumbatyan, Mezhlum A. *On the oblique wave penetration in elastic solids with a doubly periodic array of cracks*, 239
Shail, R. *A note on a problem in asymptotics*, 785
Shillor, M. *See* Rochdi, M.
Sugie, Jitsuro. *Uniqueness of limit cycles in a predator-prey system with Holling-type functional response*, 577
Sumbatyan, Mezhlum A. *See* Scarpetta, Edoardo
Taniguchi, M. *Multiple existence and linear stability of equilibrium balls in a nonlinear free boundary problem*, 283
Varlamov, Vladimir. *Long-time asymptotics of solutions of the third-order nonlinear evolution equation governing wave propagation in relaxing media*, 201
Velázquez, J. J. L. *See* Herrero, M. A.
Viaño, J. M. *See* Irago, H.
Villaggio, P. *See* Knops, R. J.
Wang, Shin-Hwa. *Existence and multiplicity of solutions of an equation from pool boiling on wires*, 331
Weinacht, Richard J. *The coupled/quasi-static approximation in one-dimensional linear thermoelasticity*, 523
Williams, Graham H. *See* Liu, Weijiu
Zhao, Huijiang. *Global existence in $L^1(\mathbf{R}_+ \times \mathbf{R})$ for a nonstrictly hyperbolic conservation law*, 627
